Internet Use Agreement: Computer lab time is a potential part of our daily program, and some classes take advantage of reserved computer labs for class research and project work. A unique login is assigned to each student for supervised computer use. While student accounts are disabled to print/download, it is important to realize there may be fewer internet restrictions at the University than typically found in K-12 schools.

Minors may be able to access email and chat rooms on our workstations. DU does not monitor minors' usage of the Internet, in general. It is the policy of the Summer Gifted and Talented Program that all computer time is monitored by Summer Gifted instructors and support staff. Parents and/or legal guardians of minors assume responsibility for their children's use of the Internet. Parents or guardians are responsible for the Internet information selected and/or accessed by their children.

I have read this agreement, and agree to allow my child under 18 years of age to use the Internet during teacher supervised computer time. I also agree that my child will conform to all classroom and computer lab rules, including any rules and restrictions regarding computer use that are posted online in our Acceptable Use Policy at <http://duit.dom.edu/policies>.
